

## 2.3 Installing the MCC Plugin

This section gives information on installing the MPLAB Code Configurator Plugin.

### Installing MCC Plugin in the IDE

1. Install MCC Plugin

Figure 2-2. Install MCC Plugin

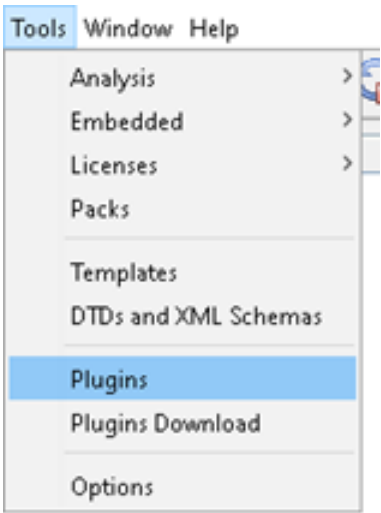

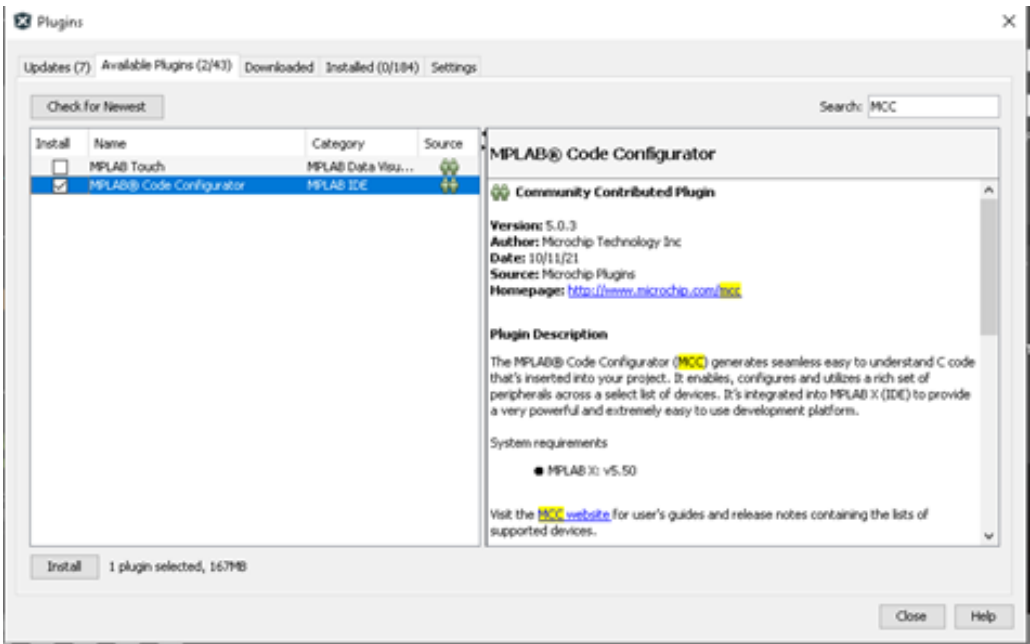

Figure 2-3. MPLAB Code Configuration Plugin

2. Configure the plugin options

Several aspects of the operation of the MCC can be managed by using the “Options” panel (see the following figure), which can be invoked by clicking Tools → Options → Plugins → MPLAB Code

Configurator in the menu bar of the MPLAB X IDE.

In the "Harmony Content Path" specify the location where the Harmony 3 repositories have been downloaded with content manager or cloned from GitHub repository. Click **Apply** and **OK**
